And have been for years.

“ My third-graders love this! Typing.com teaches them to know where the keys are so they can concentrate on what to type, not where letters are—especially as they prepare for their first required state tests. - Stephanie H., 3rd grade teacher

“ This program allows my students to gain confidence in their typing skills so it doesn't hinder their performance on exams. They work on a personalized level to improve a skill they use everyday - Julie M., K-4th grade teacher

“ My student's typing skills have soared since finding Typing.com. The best part is that the activities are quick enough that they can complete a task in only a few minutes when they finish some classwork. - Andrew S.. 9th grade teacher

**Because, while everyone is
tired of computers by now...**

Typing.com keeps students engaged and teachers empowered.

90%

LICENSES ACTIVATED

- Customizable lessons and assessments make it easy for teachers to create engaging experiences
- Guided reinforcement helps students reach success at their own pace
- Flexible, student-led education means you achieve your outcomes effortlessly

Flexible District-wide Control at No Extra Cost

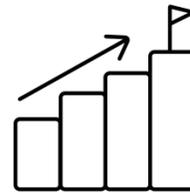

Common Core ELA and ISTE Approved
